

Suggestions for improvement:	
1	Add the ability to stop playing solutions.
2	Delay Between Moves, ms has an option to enter negative numbers, an unnecessary option since the time between calculations cannot be negative.
3	Make a field with the calculation information, as only the time and activity ratings are currently displayed.
4	Rename the Start button to Start Calculation.
5	Sort the functions in the File menu according to their purpose. Go, Clear, Play Decisions together, Select Start Position separately.
